

SECTION 4: GEE 21 FALL RETEST RESULTS

Tables 40 and 41 summarize the number and percent of students who scored at each achievement level by education classification (regular and special education) and for all students for the fall 2001, 2002, and 2003 retest administrations of GEE 21.

English Language Arts and Mathematics

Table 40 presents the statewide number and percentage of students who scored at each achievement level for regular education students, special education students, and all students who tested in English Language Arts and Mathematics for the fall 2001, 2002, and 2003 retest administrations. Among all high school students who took fall retests, the percentage of students who scored at the *Unsatisfactory* level in English Language Arts decreased from 2001 to 2002 and again from 2002 to 2003. In Mathematics, the percentage of students who scored at the *Unsatisfactory* level decreased from 2001 to 2002, but increased from 2002 to 2003.

The state and district counts and percentages of high school students who scored at each achievement level for both subjects and years are provided in Table 42. The counts and percentages reported are for all students (regular and special education students are combined). Figures 33 and 34 show the percentages of high school students who scored at the *Approaching Basic* achievement level and above. Both statewide and district results are presented by content area.

Science and Social Studies

Table 41 presents the statewide number and percentage of students who scored at each achievement level for regular education students, special education students, and all students who tested in Science and Social Studies in the fall 2003 retest administrations. The state and district counts and percentages of high school students who scored at each achievement level for both subjects and years are also provided in Table 42. The counts and percentages reported are for all students (regular and special education students are combined). Figures 35 and 36 show the percentages of high school students who scored at the *Approaching Basic* achievement level and above. Both statewide and district results are presented by content area.

NR = Numbers and percents of students scoring at each achievement level are not reported because the number of students tested is less than 10 or can not be reported.

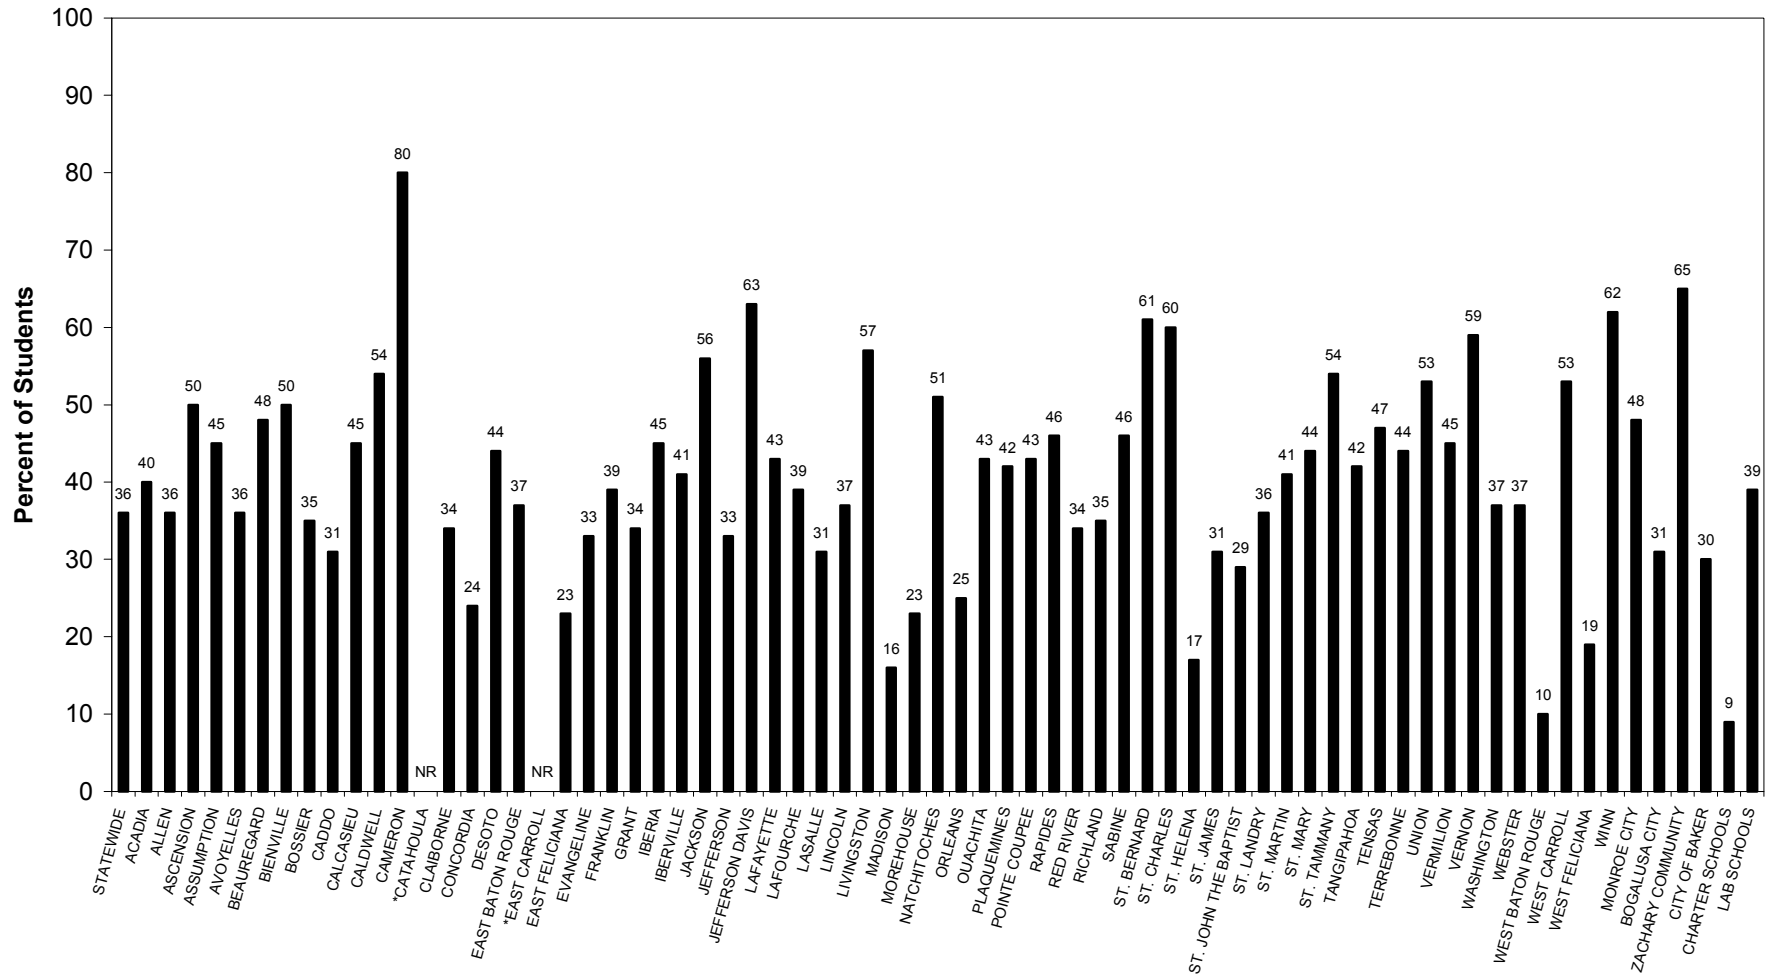

*New district in fall 2003.

Figures 33 through 36 present the percentage of students scoring at the *Approaching Basic* achievement level or above and the *Basic* achievement level or above. Statewide and district results are presented by grade level and content area.
